By IRIS

Streamlining your school's
admissions just got easier,
wherever you are.

Boost Enrolment.
Go Paperless.
Increase Efficiency.

An online, fully integrated,
custom-branded admissions experience.
Make life simpler for your entire
school and every prospective parent.

Join our growing community...

Customised Branding

A fully branded, mobile responsive admissions portal linking from your school's website, giving you full control over its look and feel.

Online Enquiries 24/7

Accessible 24/7 to register multiple entries, enabling parents to easily complete registration forms at any time.

Multiple Applications

Give parents the ability to register multiple applications within a single, easy-to-use online form.

Document Management

Upload photos and supporting documentation for each application, along with options for downloadable documents.

Registration Fee Payments

Enable parents to complete an application and easily pay relevant fees at the same time.

Email Communication

Inform parents and staff when an online application has been submitted, through personalised and automated emails.

Real-Time Reporting

Manage, review and share your admissions data quickly and efficiently with relevant stakeholders using real-time reporting.

MIS Integration

Automatically pulls all data into iSAMS, ensuring your records are always up to date and avoiding time-consuming manual data entry.

A feature-rich software to capture and manage applications from prospective students

Paperless. Streamlined.
Move your admissions online.

First impressions make
all the difference

A fully branded online enrolment process

Brand Recognition

Each portal can be fully customised with primary colour branding, logo and imagery.

Responsive

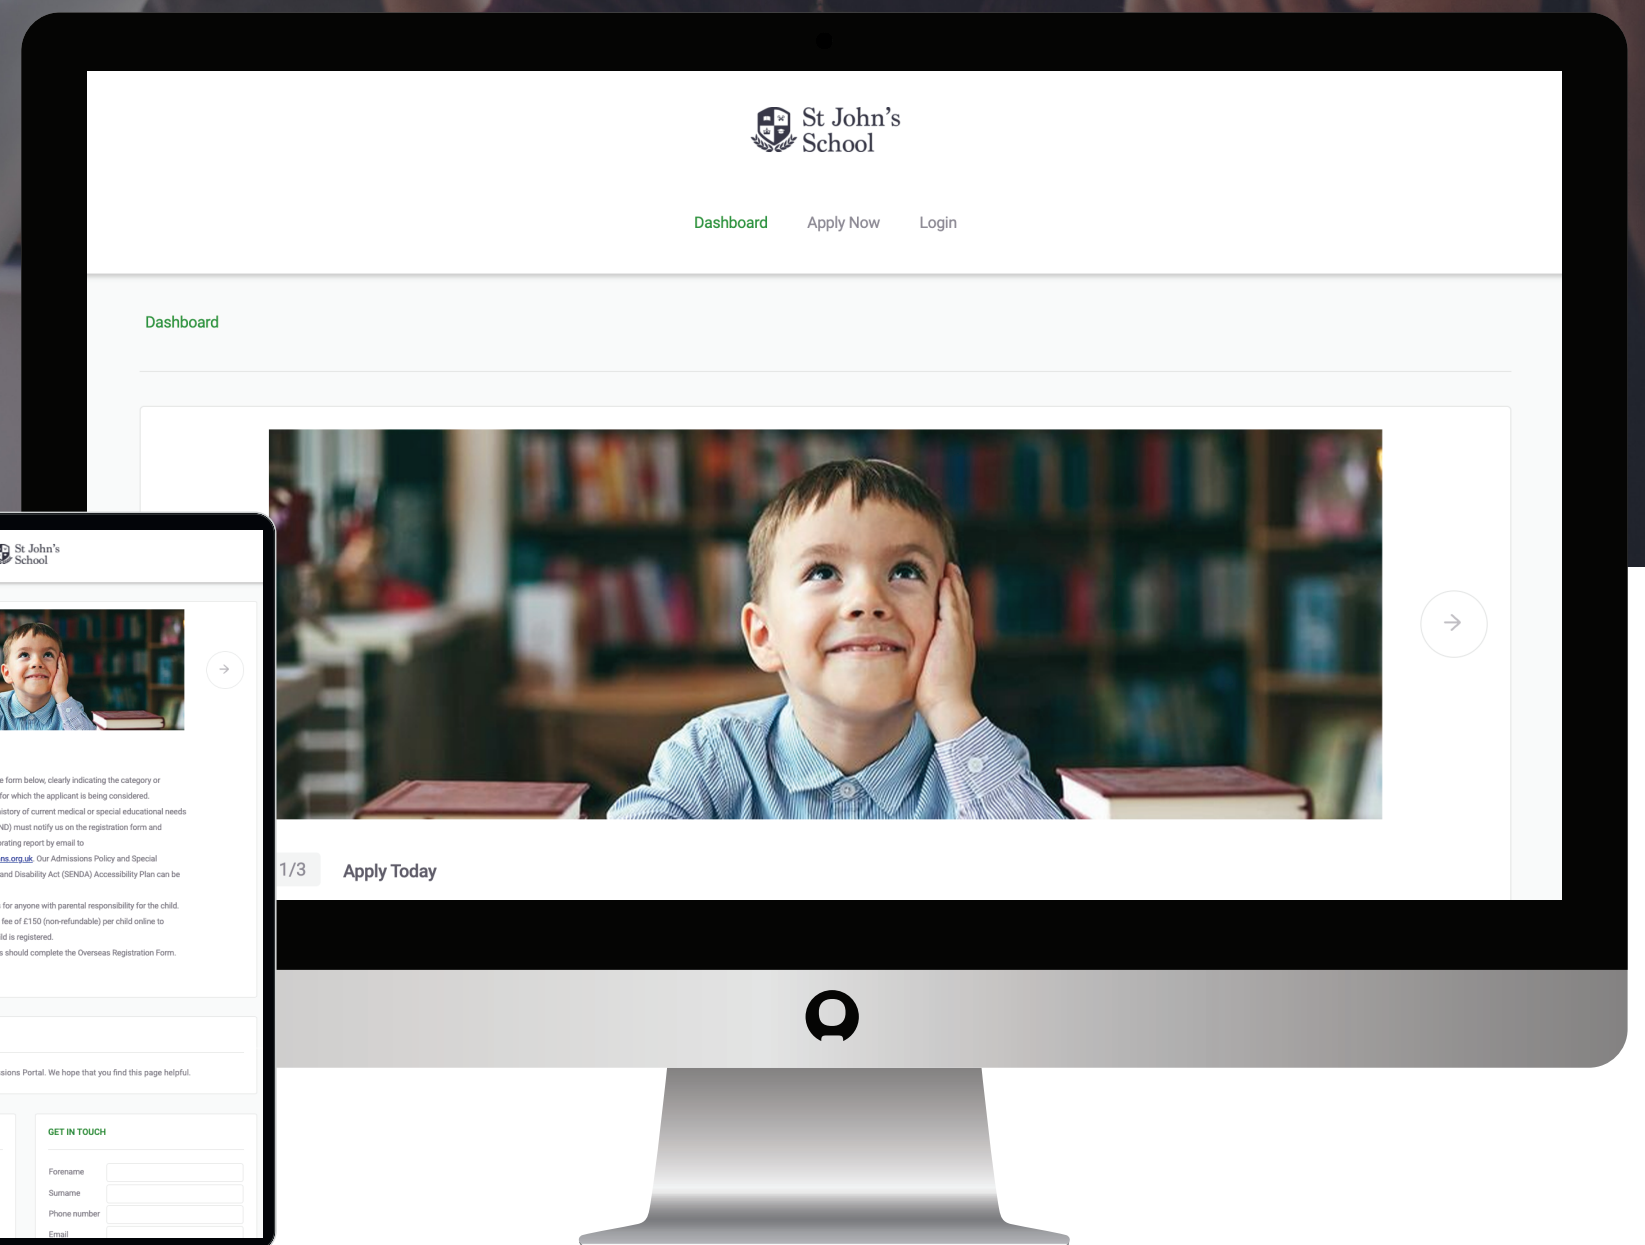

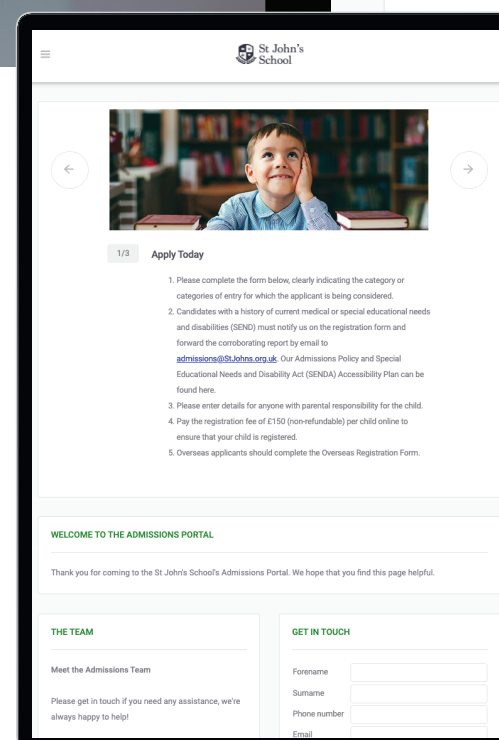

Accessible display on any device, anywhere, anytime, portrait or landscape, for absolute ease of use.

Self-Service

It's reassuring to feel in control. Parents can manage payments, track all emails, upload and view documents, and book visits or onto open days.

Save Time

By automatically populating multiple forms within the same family.

A flexible enrolment system
that's accessible anytime
and anywhere

Why move online?

Cut Costs

At a time when every penny counts, save on paper and printing costs by moving your admissions process online.

Improve Data Access

Provide your Admissions Team with 24/7 access to core information, wherever they are. Plus, parents can submit forms remotely at their own convenience.

Save Time, Space and the Environment

Working with paper is hugely time-consuming, takes up a lot of storage space and isn't environmentally-friendly, so save on all by going digital.

Enhance Security

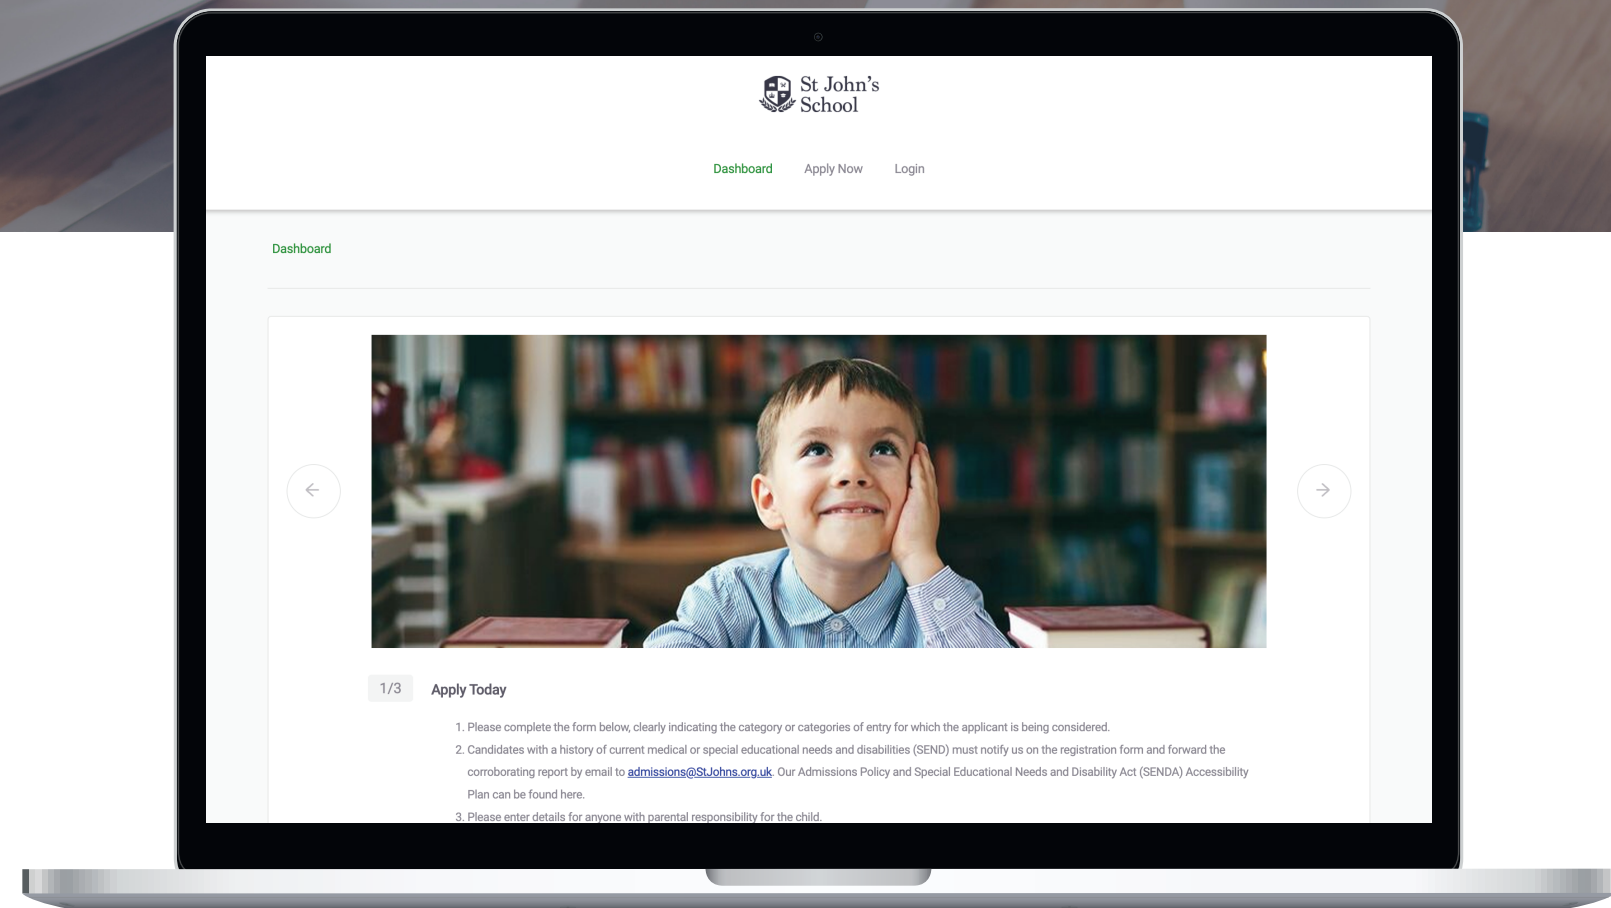

With advanced security technology, including setting permissions, data encryption and two-factor authentication, you can rely on your key data being protected.

Identify a Paper Trail

View who's accessed which documents and what changes were made more easily, with a clear record of previous versions and cloud backups to improve data recovery.

Take Online Payments

Enable parents to pay any relevant deposits directly online, feeding this information through to your MIS and Finance Team in real-time.

Get it right for the entire
school community

Introduce benefits felt by parents, students and staff

Admissions & Marketing

Introduce a fully branded and customisable admissions form for your Marketing Team, that's hosted directly on your school's website. Marketers can track applications, set up automatic emails and reminder notifications, monitor conversations for various activities and take payments directly online.

Finance Team

Capture the correct information from registration right through to enrolment, to help your Bursary ensure future billing is accurate. With the powerful reporting tools available, financial forecasting is now even easier for the academic year ahead.

Heads & Deputy Heads

Enable staff members to export data from the system to create vital reports for key stakeholders to support them in their strategic decision-making – including information on projected student numbers, feeder school analysis, and planning and conversion success rates.

Parents

Make it even easier for parents to register students directly on the school's website by submitting applications on a desktop, tablet or mobile device. Plus, allow them to pay registration and application fees instantly, register multiple children within a single form and using one user account, as well as uploading and attaching the relevant documentation.

Students

Increase the accessibility and accuracy of student information, from enrolment to setting up the iStudent App so students can have immediate access to essential school information.

System Administrators

Streamline the management of registrations and documents for multiple students, using the data submitted in one simple form which automatically syncs with your MIS. Give your System Administrators peace of mind that the information stored in the system is accurate, secure and not duplicated.

Why iSAMS?

Full Support Service

Updates, Upgrades & Maintenance

Enjoy regular system enhancements, with bi-weekly updates scheduled at times of minimal use.

Hosting

Take advantage of our hosted server, providing excellent speed, performance and security.

Training

Receive module-specific training or whole system overviews, conducted by one of our specialist Trainers.

Support

Reach our dedicated Support team with live support across multiple time zones and Service Centres in the UK and Australia.

Reporting Services

Our Reporting Services team are experts in extracting data from your system and presenting it in easy-to-read formats, helping you with all your reporting needs.

Customer Account Managers

Maximise your use of iSAMS to meet your school's needs, with advice from your dedicated Customer Account Manager.

iCommunity Site

Access all product, company and community news through this online forum, where you can also connect with peers to share new knowledge and ideas.

Marketplace

Find best-of-breed software solutions at the iSAMS Marketplace, to integrate disparate systems and streamline key school processes.

iUniversity

A dedicated online platform for on-demand iSAMS learning.

Sophisticated Software

Greater accessibility

Hosted in the cloud, iSAMS is accessible anywhere.

Long-lasting solutions

A modular architecture to build your own system and grow with it.

Make it your own

Add your own branding to the customisable front-end.

Easy to use system

Feel the benefits of intuitive system navigation.

Protect your data

With advanced security technology, your data and assets remain secure.

Innovative technology

Developed with the latest, most reliable server and client-side technology.

Satisfied schools

1,600+ schools and counting have made the switch to iSAMS

“iSAMS is the most intuitive, flexible and user-friendly school MIS that I have come across in my career so far. They are progressive and up-to-date with the latest technologies and recently, with the release of their apps, it has positively transformed the way we manage various in-house processes and improved our parental engagement and communication.”

Benoy Ittyavirah — Director of IT, Staff Training & Development

Wycliffe College, Gloucestershire, England

“Our school was looking for a student information system which could integrate well with other systems and provide the level of customisability we were looking for, iSAMS was the only one which gave us this!”

Jacob Martin — Director of Teaching & Learning

International School of Zug and Luzern, Baar, Switzerland

“The support team is quick to respond to queries and we now benefit from extended links via the iSAMS community. The on-site training offered in school is fantastic, providing bespoke development and support for a small group of users at good value for money.”

Louise Orton — Deputy Head, Teaching & Learning

Sherborne Girls, Dorset, England

“Since moving to iSAMS the day-to-day management of our school data has improved significantly, increasing efficiency across the school.”

Mark Smith — Technical Services Manager

Cheadle Hulme School, Greater Manchester, England

“I would recommend it highly for independent and international schools. I can’t think of an MIS system that would do a better job. Everything we want to do we can do with iSAMS, and we can now provide a better education for our pupils.”

Richard Marchant — Principal

New English School Kuwait, Jabriya, Kuwait

“iSAMS fulfilled all our criteria and we liked how we could add modules as required over time or tap into other systems on the Marketplace to add even more depth of functionality. It was hard to say no to iSAMS becoming our school’s new management information system.”

Sheila Stamp – IT Manager

Discovery Bay, Hong Kong

“What do we like most about iSAMS? It’s intuitive, it’s user-friendly. It does the core things extremely well.”

Chris Jones, Deputy Head of Senior School

British School of Manila, Philippines

2005

iSAMS officially launches, offering the first web-based MIS on the market, and welcoming Rugby School and Warwick School

2008

iSAMS receives growing interest from some well-known schools and we welcome our first Prep School

2009

iSAMS goes global and we welcome our first school international schools

2011

We welcome our 100th client

2014

We welcome our 300th school, including our first Grammar School

2015

We launch our suite of multi-lingual Mobile Apps, compatible on iOS and Android

2016

We are recognised as the leading MIS supplier to Independent Schools, and we introduce the iSAMS Marketplace

2017

Over 850 schools, academies and MATs have chosen iSAMS as their trusted MIS partner

2018

We launched our Wellbeing Manager and Data Protection modules, plus our fully integrated, online accounting solution - iFinance

2019

Even more intuitive than before, our improved user interface and secure single sign-on MIS now supports 950+ schools in over 75 countries

2020

iSAMS joins the IRIS Software Group and we’re proud to welcome our 1,000th school to our growing community, which now spans more than 80 countries.

2022

We welcomed our 1,300th school and launched iUniversity, an on-demand learning platform, plus a payment gateway designed for schools.

2024

Introduced Central, powered by PowerBI, and now supporting 1,600+ schools globally with 1.5 million student profiles.
